400 million fixed increase in energy storage and solar

Overview

Solar and storage developers face a sharp increase in equipment procurement costs from Q4 2025 onwards due to Chinese government policy changes and supply-side production cuts, which are bringing an end to the era of low prices that have characterized the market for the past 18 months, according to a new report from Wood Mackenzie. Can China scale up energy storage investments?

This study explores the challenges and opportunities of China's domestic and international roles in scaling up energy storage investments. China aims to increase its share of primary energy from renewable energy sources from 16.6% in 2021 to 25% by 2030, as outlined in the nationally determined contribution .

Is China entering a new era of energy storage demand?

Mainland China accounts for most of the global energy storage demand, driven in the near term by regional requirements for new utility-scale wind and solar projects to include energy storage capacity. However, the Chinese market is entering an era of change.

Is China's energy storage capacity poised for significant growth?

Fueled by innovative technologies and rapid advances in the renewables sector, China's energy storage capacity is poised for significant growth, the National Energy Administration said on Wednesday.

How can energy storage technologies address China's flexibility challenge in the power grid?

The large-scale development of energy storage technologies will address China's flexibility challenge in the power grid, enabling the high penetration of renewable sources. This article intends to fill the existing research gap in energy storage technologies through the lens of policy and finance.

Is China's power storage capacity on the cusp of growth?

[WANG ZHENG/FOR CHINA DAILY] China's power storage capacity is on the cusp of growth, fueled by rapid advances in the renewable energy industry, innovative technologies and ambitious government policies aimed at driving sustainable development, experts said.

How many new energy storage projects are there?

According to NEA's Bian, the government has released a list of 56 new-type energy storage pilot demonstration projects since the beginning of this year, including 17 lithium-ion battery projects and 11 compressed air energy storage projects, among others.
