

## Kongres Container

# 5MWH liquid cooling of communication base station batteries disappears

## Overview

---

What is a 5MWh liquid-cooling energy storage system?

The 5MWh liquid-cooling energy storage system comprises cells, BMS, a 20'GP container, thermal management system, firefighting system, bus unit, power distribution unit, wiring harness, and more. And, the container offers a protective capability and serves as a transportable workspace for equipment operation.

What is a 4/5 MWh battery energy storage system?

CPS is excited to launch the new 4/5 MWh Battery Energy Storage System for the North American market. The battery system is a containerized solution that integrates 10 racks of LFP batteries for the 4 MWh model and 12 racks of LFP batteries for the 5 MWh model, and offers a high energy density for utility applications.

What is a 2.5mw/5.016mwh battery compartment?

The 2.5MW/5.016MWh battery compartment utilizes a battery cluster with a rated voltage of 1331.2V DC and a design of 0.5C charge-discharge rate. The energy storage batteries are integrated within a non-walk-in container, which ensures convenient onsite installation.

What are battery energy storage systems (Bess)?

As the demand for sustainable energy solutions grows, Battery Energy Storage Systems (BESS) have become crucial in managing and storing energy efficiently. This year, most storage integration manufacturers have launched 20-foot, 5MWh BESS container products.

What is a battery management system (BMS)?

BESS employs a sophisticated, multilevel battery management system (BMS) for system monitoring and control. Each battery management system including: At the lower level is the Module BMS (BMU), which is designed to

detect voltage, temperature, and execute cell balance functions for cells.

What is a battery cluster management unit (BCMU)?

It is equipped with a built-in Battery Cluster Management Unit (BCMU), which enables battery cluster control, protection, data acquisition, and power distribution functions. This product adopts a design with 2 inputs and 2 outputs. The product utilizes a liquid cooling method for temperature control.
