**An enterprise in Côte d Ivoire
that produces inverters for
communication base stations**

Overview

Why did Côte d'Ivoire become a leading electricity exporter in West Africa?

Those tough years nevertheless provided Côte d'Ivoire with an opportunity to find a unique, innovative energy solution, paving the way for the country to develop the third largest electricity generation system on the continent and become one of the leading electricity exporters in West Africa.

Is Côte d'Ivoire a telecommunication sector?

Côte d'Ivoire is a major player in the telecommunications sector, with the sector constituting approximately 11 percent of GDP and annually contributing tax revenue of approximately \$900 million.

Does Côte d'Ivoire have hydropower?

As of 2023, hydropower in Côte d'Ivoire accounted for about 30% of electricity generation. Although periods of severe drought sometimes lead to interruptions in supply, the realization of untapped hydropotential could be a cornerstone for the development of the energy sector. Table 2. Renewable energy resources of Côte d'Ivoire.

What equipment does Ivorian telecommunications need?

The Ivorian telecommunications market will need suppliers for the full range of telecommunications equipment, to include copper and fiber optic cables, central office switches, cellular stations, data communications satellites, microwave communication equipment, and data management solutions.

Does Côte d'Ivoire have a power grid?

The grid is expected to cover 99% of the population by 2035, and 42% of the energy produced will come from renewable sources. That is reassuring news for Côte d'Ivoire. In the wake of the post-electoral crisis of 2011, only 34% of the population had access to electricity. Today, close to 94% of Ivorians are connected to the power grid.

Is Côte d'Ivoire dependent on energy imports?

According to , in 2023 in Côte d'Ivoire, the total production of primary energy was 0.163 quadrillion Btu, while consumption was at the level of 0.265 quadrillion Btu. Thus, the share of domestic production in primary energy consumption was about 61.5%. This makes Côte d'Ivoire a country dependent on energy imports. Figure 2.
