Are German 5G base stations shared by telecom operators

Overview

Does Germany have a 5G network?

The German Federal Network Agency allocated frequencies in the 3.7 to 3.8 GHz and 26 GHz bands for local 5G purposes, with more than 140 companies now able to operate their own local networks. There is no obligation for nationwide spectrum holders to enter into a national roaming agreement with local 5G network operators.

What is a 5G Spectrum in Germany?

However, unlike low-range frequencies, their coverage is very limited, which is why these networks are confined to local areas. Today, mobile communications operators in Germany can already make use of a spectrum of more than 1000 MHz. As soon as 5G transmission and reception technology is available, this spectrum can also be used for 5G services.

What is the 5G initiative for Germany?

In the autumn of 2016, the Federal Government launched its 5G Initiative for Germany, which represents a framework for action that is to support the deployment of 5G networks and the development of 5G applications at an early stage.

How can Germany benefit from 5G technology?

With industry contributing 22.8 % to the whole economic output, Germany can benefit considerably from an early introduction of 5G technology. Moreover, this technological evolution has the potential to improve the quality of life of each and everyone of us.

How is Germany preparing for 5G?

From the provision of test radio frequencies to the timely provision of frequencies for the commercial rollout, the Federal Government is undertaking a series of measures to enable the earliest possible use of 5G technology in

Germany.

What makes Germany a 5G lead market?

Five elds of action for Germany as 5G lead market Against the backdrop of the digital transformation of society and the economy, the comprehensive availability of digital infrastructures in cities and rural regions is becoming the decisive strategic location factor. This applies, in particular, to the successful introduction and spread of 5G.
