# Are there any 5G base stations jointly built by Algeria Communications

## Overview

---

How many 5G base stations are there in the world?

In addition, a total of 819,000 5G base stations have been built by these three telecom giants, accounting for 70% of the world's total. As China has played a leading role in 5G technology, its 5G development has extraordinary significance for other countries.

What does Algérie Telecom stand for?

Algeria Telecommunications Corporation (French: Algérie Télécom) is the state owned telecom operator in Algeria. It is a public company active in the fields of fixed phone and internet. Algérie Télécom was created on 5 August 2000. For more information, visit Algeria Telecom at [About Juniper Networks](#).

What is Algeria Telecom's strategic plan?

Algeria Telecom has formed a mid-term strategic plan to implement a transport network with a homogenized, optimized topology as well as automation capabilities that guarantee bandwidth and future-proofing of its infrastructure in a growing market.

Why should Algeria Telecom join the NEC-Juniper Global Alliance?

"This, combined with our accumulated domain expertise at the NEC 5G Transport Network Center of Excellence (CoE) in EMEA, makes us confident that our extended engagement through this partnership will help enable continuous success and advancement of Algeria Telecom's business."
