Argentina's government said on Monday it has awarded contracts for 667 MW of capacity in its first tender dedicated to battery energy storage systems (BESS), exceeding its original 500-MW target by about 30%. Energy storage battery. Photo by Anna Vasileva These projects will be installed in.

Learn about the market conditions, opportunities, regulations, and business conditions in Argentina, prepared by at U.S. Embassies worldwide by Commerce Department, State Department and other U.S. agencies' professionals Argentina has the world's third-largest wind reserve, which exceeds Spain's.

Argentina is making significant strides in its renewable energy transition, enhancing its energy matrix with new wind and solar plants. In the third quarter of 2024, the country added 216.5 MW of capacity to the Argentine Interconnection System (SADI), strengthening its commitment to sustainable.

Argentina has awarded 667MW of battery energy storage system (BESS) in its first tender under the AlmaGBA scheme. Nearly half of the volume submitted for the tender (1.3GW) has been awarded by the wholesale market operator CAMMESA (Compañía Administradora del Mercado Mayorista Eléctrico Sociedad).

AES is the world leader in lithium-ion-based energy storage, both through our business project and joint venture, Fluence. We pioneered the technology over one decade ago, and today almost half our new projects include a storage

component. [pdf] How much will Buenos Aires invest in storage.

Argentina has taken a decisive step toward modernizing its power infrastructure, drawing international attention with its first large-scale battery energy storage tender. Designed to reinforce the grid in the greater Buenos Aires area, the initiative has sparked significant interest—receiving more.
