Australian Forest Solar Power System

Overview

The Australia-Asia Power Link (AAPowerLink) is a proposed electricity infrastructure project that is planned to include the , the world's largest battery, and the world's longest . Initial plans forecast that a new in the of Australia would produce up to 20 of electricity, most of which would be exported.

Forest Glen Solar Farm is a ground-mounted solar project. The project is expected to generate 221,000MWh electricity and supply enough clean energy to power 25,000 households. The project is expected to offset 164,000t of carbon dioxide emissions (CO₂) a year.
