Austrian Power Supply Bureau Energy Storage solar

Overview

Why is Austria boosting its solar power capacity?

Moreover, the maximum subsidy for electrical storage systems has been raised from €25,000 to €50,000, reflecting a commitment to bolstering the infrastructure necessary for sustainable energy storage. Austria's solar power capacity has been on a steady upward trajectory, buoyed by supportive government policies and declining technology costs.

What is Austria's solar power capacity?

Austria's solar power capacity has been on a steady upward trajectory, buoyed by supportive government policies and declining technology costs. As of the end of 2023, Austria's solar power capacity had reached 3,667 MW, according to the International Renewable Energy Agency (IRENA).

How much solar power does Austria have in 2023?

As of the end of 2023, Austria's solar power capacity had reached 3,667 MW, according to the International Renewable Energy Agency (IRENA). This growth has been propelled by an array of policy measures, including feed-in tariffs, investment subsidies, and now, the updated guidelines for PPAs.

Why is Austria allowing PV systems with PPAs to receive subsidies?

By enabling PV systems with PPAs to receive additional subsidies, the Austrian government is facilitating easier access to financing for developers of new projects. The revised guidelines are part of Austria's broader strategy to transition to a low-carbon economy and achieve its renewable energy targets.

Is Austria poised for a significant transformation in solar energy?

Austria's solar energy sector is poised for a significant transformation as the government updates its subsidy guidelines to incentivize more power purchase agreements (PPAs) for solar photovoltaic (PV) projects.

Are there any solar storage subsidy programs?

Last year, there were two major solar storage subsidy programs: KLIEN and ÖMAG. ÖMAG subsidized 31,000 energy storage systems at a rate of 200 EUR/kWh. Since ÖMAG's funding was expected to run out in 2023, KLIEN was introduced as a supplement to ÖMAG.
