

## Kongres Container

# Azerbaijan s container housing has its own power generation

## Overview

---

How will Azerbaijan become a leader in green energy?

Azerbaijan is committed to developing its renewable energy potential, which is an important part of the country's plan to reduce greenhouse gas emissions by 40% by 2050. The country intends to increase renewable power capacity to 30% by 2030 and diversify its existing energy system to become a leader in green energy.

How much energy does Azerbaijan have?

Azerbaijan has a total installed capacity of over 7.5 gigawatts (GW): 6.5 GW of oil- and gas-fired generation and 1.1 GW of hydro. In addition, the country has a small amount of wind, solar and other renewable energy generation.

What is the economic potential of solar energy in Azerbaijan?

Azerbaijan's economic potential of solar energy is 23 GW. The region's favourable climate, boasting 2,400-3,200 hours of sunshine annually, gives Azerbaijan strong potential as a solar energy producer. In October, the 230 MW Garadagh Solar PV Plant was inaugurated.

Can Azerbaijan create a green hydrogen sector?

Azerbaijan is actively working to bring its vision of a dynamic green hydrogen sector to life. The collaboration agreements inked with global private sector actors will enable the development of around 10 GW of renewable energy in the medium term that can contribute to the production of hydrogen.

What is Azerbaijan's wind energy potential?

Azerbaijan's wind energy potential holds immense promise, with both onshore and offshore resources presenting significant opportunities for sustainable power generation. The country boasts 3 GW of economic potential of onshore wind, as well as an impressive 157 GW of technical capacity of offshore wind.

Can Azerbaijan be a solar energy producer?

The region's favourable climate, boasting 2,400-3,200 hours of sunshine annually, gives Azerbaijan strong potential as a solar energy producer. In October, the 230 MW Garadagh Solar PV Plant was inaugurated. Several other projects are underway, and the country continues to sign agreements with stakeholders interested in its solar energy.
