# BMS battery panel

## Overview

---

A BMS PCB board (Battery Management System Printed Circuit Board) is a specialized circuit board designed to monitor and protect battery packs. What is a battery management system (BMS) board?

A Battery Management System (BMS) board is the brain behind battery operations. It plays a crucial and indispensable role in ensuring the safe, efficient, and long-lasting performance of batteries across a wide range of applications, from electric vehicles to portable electronic devices. It monitors and manages key parameters such as:

Do lithium ion batteries need a BMS system?

Lithium-ion batteries, especially custom lithium ion battery packs, need a BMS (Battery Management System) to ensure the battery is reliable and safe. The battery management system is the brain of the lithium battery and reports the status and health of the battery. Let's get a better understanding from this article. What is a BMS System?

.

What is centralized battery management system (BMS)?

The topology of battery management system plays key role in determining how battery packs are monitored, controlled, and maintained. In centralized BMS topology, a single BMS printed circuit board (PCB) contains a control unit that monitors all battery cells using multiple communication channels. This design leads to a larger, less flexible BMS.

What is a BMS board?

BMS boards are the core of this system. It focuses on monitoring and regulating the battery functions and states in battery management. While the term "BMS board" may not be familiar to you, its practical application is likely something you are acquainted with. The BMS board can be used for lithium-ion battery management purposes.

What is a BMS in a battery pack?

A BMS is a PCBA (printed circuit board assembly) in the battery pack. The main components mounted on the BMS printed circuit board include:  
Microcontroller (MCU): It gathers and processes current signals from the CCS to monitor the voltages and temperatures of the cells.

What is a battery management system?

The battery management system is the brain of the lithium battery and reports the status and health of the battery. Let's get a better understanding from this article. What is a BMS System?

The BMS (Battery Management System) serves as the circuit protection component in the battery.
