## Overview

---

How will technology transform the Bahamas' energy system?

Advanced technologies are being integrated into the nation's energy framework to create a more resilient grid, tailored to meet the unique needs of New Providence and the Family Islands. This transformation will incorporate a variety of sustainable energy sources, including: Microgrids will play a key role in The Bahamas' energy transformation.

How has the Davis administration reformed the energy system in the Bahamas?

Energy Reform APRIL 2025 Summary The Davis Administration has embarked on the most ambitious and far-reaching reform of the energy sector in the history of The Bahamas. This reform is guided by the understanding that energy is central to national development and that the longstanding failures in the electricity system.

What is securing the Bahamas' energy future?

and focus, discipline, and courage. This document, *Securing The Bahamas' Energy Future*, is a record of that choice—and a roadmap of the journey we are taking together. It lays out clearly where we started, the obstacles we inherited, and the urgent interventions we made.

What will Bahama's energy system look like in the future?

early defined rules of engagement. Looking ahead, Bahamians can expect their energy system to become more than just functional. It will be a driver of prosperity. As the reforms continue to unfold, citizens will experience more equitable access to services, better value for money, and a greater degree of self-determination over their country.

Is the Bahamas ready for a new energy era?

"The Government of The Bahamas is committed to a new energy era where

modernized infrastructure, clean energy, and major reforms drive down costs and enhance reliability for all Bahamians. This transformation won't happen overnight, but its impact will be game-changing."

Did Bahamian electricity reforms teeter on the edge of collapse?

transformation was greater still. The reforms that followed were not e:  
Stabilizing a Collapsing SystemBy late 2021, it was evident that the Bahamian electricity sector was teetering on the edge of collapse. BPL was insolvent, the generation system was failing, and the grid infrastr
