Bahrain communication base station wind power damaged

Overview

Will Bahrain achieve net-zero emissions by 2035?

The Kingdom of Bahrain aims to reduce emissions by 30 percent by 2035 and achieve net-zero emissions by 2060, as outlined in its National Energy Strategy. As a global clean energy pioneer, Masdar will utilize its well-established expertise and track record in delivering wind energy projects globally, both onshore and offshore.

Why is Bahrain partnering with the National Energy Strategy?

This strategic collaboration signifies a bold step towards realizing the ambitions outlined in Bahrain's National Energy Strategy, propelling us closer to our net-zero goals. Together, we will pave the way for a more sustainable and resilient future for generations to come.

What is Masdar doing in Bahrain?

Marking a strategic entry into the Bahrain market for the UAE's clean energy champion, the agreement for near-shore and offshore wind farms is Masdar's first in the Kingdom and will be the first project of its kind in the region and the Middle East.
