# Balanced lithium battery pack

## Overview

---

What is battery balancing & battery redistribution?

Battery balancing and battery redistribution refer to techniques that improve the available capacity of a battery pack with multiple cells (usually in series) and increase each cell's longevity. A battery balancer or regulator is an electrical device in a battery pack that performs battery balancing.

Do I need balancing my LiFePO4 battery pack?

To optimize the performance and safety of your LiFePO4 battery pack, balancing is not just recommended—it's necessary. There are two primary methods for balancing LiFePO4 batteries: top balancing and bottom balancing.

What is battery cell balancing?

Battery cell balancing brings an out-of-balance battery pack back into balance and actively works to keep it balanced. Cell balancing allows for all the energy in a battery pack to be used and reduces the wear and degradation on the battery pack, maximizing battery lifespan. How long does it take to balance cells?

.

Do you know how to balance a lithium battery pack?

Whether you are new to battery building or a seasoned professional, it's totally normal to not know how to balance a lithium battery pack. Most of the time when building a battery, as long as you use a decent BMS, it will balance the pack for you over time. The problem is, this can take a very, very long time.

Can you put a Li-ion balancer in a battery pack?

You can also place a li-ion balancer in your pack to perform active cell

balancing, increasing the lifetime of your battery pack. When you wire an active balancer in your pack, you want to make sure that the balancer matches the series groups that you have in your pack.

Does a lithium ion battery have a balance problem?

If you built a lithium-ion battery and its capacity is not what you expect, then you more than likely have a balance issue. While it's true that cells connected in parallel will find their own natural balance, the same is not true for cells wired in series. Battery cells in series have no way of transferring energy between one another.
