Barbados installs solar power for home use

Overview

The Solar House Project is an initiative of the Ministry to create greater awareness of renewable energy and the benefits of using various energy conservation technologies for enhanced energy efficiency. The house has different kinds of insulation in the roof to act as a thermal barrier. Is Barbados a leader in solar energy?

Continue reading → Barbados continues to maintain a leadership position in solar energy within the Caribbean. Building on a successful Renewable Energy Rider program which has seen 9MW of distributed solar PV installed, the electricity market has finally opened up to independent power producers (IPPs) to develop utility scale solar projects.

Should you buy a solar PV system in Barbados?

One of the biggest, if not the biggest hurdle to further solar PV penetration in Barbados is the upfront cost of a system. When you think about the fact that the cost is essentially the prepayment of 25-30 years worth of electricity it makes sense that the price is “high”. If you could purchase a. Continue reading →.

Does Barbados have a solar water heater?

Nevertheless, there has been a high penetration of solar water heaters (over 30%) since the 80s, which showed Barbados’ appetite to embrace innovative renewable energy technologies.

Can Barbadians earn passive income from solar panels?

Now a very similar model is available in Barbados which allows Barbadians to own solar panels within an operating solar project and thereby earn solar passive income for 25. Continue reading → Getting involved in the funding of the global solar power transition has never been easier.

Can independent power producers develop utility scale solar projects?

Building on a successful Renewable Energy Rider program which has seen 9MW of distributed solar PV installed, the electricity market has finally opened up to independent power producers (IPPs) to develop utility scale solar projects. This is the first time in. Continue reading →.

Why did Barbados develop the Smart fund?

Barbados then developed its first financial facility to support renewable energy and energy efficiency, called the Smart Fund, where the government provided financial incentives for small and medium enterprises to install PVs and LEDs, thus saving important resources for the country.
