**Base station power is yellow
and has no output reason**

Overview

Solid yellow on the base station implies no connection to your network. Try a different Ethernet cable (doing that will check both the cable and connections). If that doesn't work, try a different router port. If neither of those work, try power-cycling your router.

Solid yellow on the base station implies no connection to your network. Try a different Ethernet cable (doing that will check both the cable and connections). If that doesn't work, try a different router port. If neither of those work, try power-cycling your router.

However, seeing a yellow light on the Wyze Base Station may be a sign of a problem . It serves as a visual alert, indicating the need for investigation and repair. One of the causes of this issue is expired firmware on the Wyze Base Station. This article will explain all the causes of Wyze Base.

My Wyze base station for my outdoor cam recently went offline. When I power cycle it the yellow is just a constant yellow. Because of this. my Wyze Outdoor Camera is no longer working. Oddly enough, my doorbell also went down. It says no connection. I don't believe it talks to the basestation at.
