Overview

Will a shortage of electricians delay expansion?

Meanwhile, Microsoft and Google warn that a shortage of skilled electricians could delay expansion, with estimates that the U.S. will need 500,000 more electricians in the next decade. Electric vehicles, heat pumps, and electrified industry are adding further strain.

How much new peak hour supply is needed by 2030?

estimates of this is directly an additional 100 GW of new peak hour supply is needed by 2030. Of up with the demand. is accelerating is accustomed to moderate centers to the grid. and gas, and nuclear, is essential in planning. conditions. Emergency after significant 1 (EEA1) as black-outs a result of but other RTOs. In May 2025.

Will demand-side solutions meet projected load growth?

Demand-side solutions are unlikely to suffice for meeting projected load growth. Large amounts of new supply will be needed. Since each type of supply resource has its own challenges, a diverse portfolio will be needed to provide enough supply quickly enough and cost-effectively. Supply-side options include the following:.

Why did the DOE change the efficiency standard in 2024?

In April 2024, the DOE modified the new efficiency standard to allow more time for manufacturers to adjust production processes and source key components from other suppliers.

Are RTOs making progress with network upgrades?

When network upgrades are needed, the key is to do it faster and cheaper. Here, too, RTOs are making progress by replacing reactive planning with more proactive planning of processes and upgrades (including reconductoring) ahead of need.
