

## Kongres Container

# Battery container prices

## Overview

---

In 2025, average turnkey container prices range around USD 200 to USD 400 per kWh depending on capacity, components, and location of deployment. What is a battery container?

UNISEG's Battery Container is designed for the safe and convenient storage and transportation of waste / used lead acid batteries (car & automotive).

How to choose a battery storage container?

To choose the right battery storage container, keep the following points in mind: It should be designed to keep the positive and negative battery contacts from touching each other and be large enough to fit the number of batteries you usually have on hand.

Can a shipping container store a battery?

A shipping container can be a great solution to store a battery. In fact, a converted shipping container is perfectly suited for storing batteries that meet certain criteria. Many batteries are transported in our units, making them an ideal solution for storage as well.

What battery sizes can the container hold?

The container is designed to hold large D batteries all the way down to small AAA batteries. They come in a set of two and they have plastic dividers built right in. The dividers are spaced differently.

How many battery cells are in a high voltage box?

It is composed of 104 battery cells, which are 1 in 46 strings. The high-voltage box contains the battery cluster management unit and protection and control electrical components, which are used to manage and protect the operating status of the entire battery cluster.

How many batteries are in a battery cluster?

Each battery cluster is comprised of 4 battery boxes and 1 high-voltage box. A single battery box is composed of 1 in parallel and 104 battery cells in series. It is composed of 104 battery cells, which are 1 in 46 strings.
