Battery energy storage project groundbreaking ceremony

51.2V 300AH

Overview

RWE breaks ground on Germany's largest battery storage project at the former Gundremmingen nuclear power plant in Bavaria, investing €230 million to deploy 850,000 lithium iron phosphate battery cells with 400MW power capacity and 700MWh storage capacity, scheduled for commercial operation in early 2028, marking Germany's historic transition from nuclear energy to renewable energy.
