## Overview

---

Is Belgium a good place to invest in battery storage?

Belgium is one of the most active and mature grid-scale energy storage markets in Europe, with diversified opportunities for monetising battery storage via flexibility markets and a supportive regulatory regime.

Where is the largest battery energy storage system in Europe?

The largest battery energy storage system in mainland Europe has gone live in Belgium, as Sungrow and ENGIE completed the first 400MWh phase of the 200MW/800MWh Vilvoorde project. Project: ENGIE Vilvoorde Battery Energy Storage System Capacity: 200MW / 800MWh (400MWh Phase 1 online)  
Location: Vilvoorde, Belgium.

What is the D-Stor battery storage project in Belgium?

A digital illustration of the D-STOR battery storage project in Belgium. Image: BSTOR. Project owners BSTOR and Energy Solutions Group have started building separate BESS projects totalling 440MWh of capacity in Belgium, following financial close, both of which will use Tesla Megapacks.

Why is battery storage important for Belgium's energy transition?

Upon completion of the second 400MWh phase by the end of 2025, the entire installation will be providing clean, stable power for about 96,000 homes and helping stabilize Belgium's power grid. Battery storage is one of the most vital, yet too often overlooked, pieces of the energy transition jigsaw," said Moritz Rolf, Sungrow Europe Vice President.

What does the Visé project mean for Belgium's energy infrastructure?

The Visé project is scheduled to play a vital role in Belgium's energy infrastructure once operational. It reflects increasing interest in battery storage across Europe as countries seek to optimise renewable energy use and modernise their grids.

## Can battery storage parks energize the green transition in Belgium?

The milestone of reaching financial close was celebrated as a significant step towards energizing the green transition in Belgium. Olivier Bouchat of Wallonie Entreprendre highlighted the importance of battery storage parks in stabilizing Belgium's energy grid, especially with the increasing reliance on decarbonized energy sources.
