# Belize Power Plant

## Overview

---

Why did the government buy the hydropower plants in Belize?

The Government's acquisition of the hydropower plants transfers the facilities to Belizean ownership, thus keeping the company's future profits locally. Crucially, the Government intends to eliminate the annual increases in the cost of power sold by the hydro plants to BEL, and in so doing, provide a significant benefit for all consumers.

Who owns hydro Belize Limited?

The new Hydro Belize Limited, headquartered in San Ignacio, Cayo District, is led by CEO Kay Menzies, with an entirely Belizean team of 48 staff members. The Government's Interim Board for Hydro Belize will be chaired by Ambassador Lynn Young, an accomplished veteran of both BEL and Fortis Belize.

What is the capacity of Belize Electricity Limited?

Belize Electricity Limited. The total capacity figure of 134.92 MW does not include imported electricity from Mexico (CFE), which is included in the table below. Table 2. Electricity Production 4.2 Peak Electricity Demand The highest level of electrical power consumption within a specific timeframe, usually a day, a season, or a year refers.

Who is covered by Belize Electricity Limited?

Belize Electricity Limited. Therefore, its coverage is limited to national grid-connected customers and does not include microgrid or mini-grid systems, which are present in Belize. It also excludes coverage of privately generated electricity or electricity sourced.

Is electricity a primary or secondary energy source in Belize?

Central de Electricidad (CFE). It should be noted that electricity from hydro, wind, and solar, that is, dynamic sources, is considered primary, whereas electricity

converted from any pre-existing fuel, particularly combustibles, is considered a secondary energy source. Belize's secondary energy supply added up to 11,470 TJ in 2012.

What is primary energy supply in Belize?

Primary Energy Supply, by fuel type: The energy supply represented by fossil fuel production within Belize would typically include petroleum gas flared on-site, along with the unrefined products natural gas and crude oil, according to international energy reporting standards. However, that aspect of fossil fuel energy
