Can Cyprus Communications 5G base station be used

Overview

Can I use 5G outside of Cyprus?

Yes, you can use 5G outside of Cyprus, but this depends on the availability of 5G in the countries you visit and the roaming agreements that Cyta has with local providers.

Does Cyta charge for 5G network access?

There is no additional charge for Cyta's 5G network. What is required is a 5G certified device and an area with 5G network coverage. What do you need to do for Cyta 5G network access?

.

What radio frequency is used in Cyprus?

In Cyprus, the radiowaves spectrum that has been licensed by the state (700MHz and 3.6 GHz) are very close to those frequencies that have been used for years by the existing mobile phone technologies and digital television. It is worth noting that home Wi-Fi frequencies operate at 2.4GHz and 5GHz.

Is 5G a new technology?

When cars first appeared, people were running away like mad to avoid them for fear of being hit. The 5G is not a new system-we have been using wireless technologies for decades as means of communication and the 5G is merely one of them. But there is another factor at play here.

Why do I need additional transmitters in Cyprus?

This particular frequency requires additional transmitters due to the limited transmission of the signal in high frequencies such as this one. The radiofrequency spectrum licensed in Cyprus is at 700MHz and 3.6GHz that do not require additional transmitters than the existing ones.
