Converting your current AC electric water pump to solar is actually an easier process than it sounds! The first step is identifying what kind of conversion kit is right for you. When you call into RPS we'll ask you a few questions first. 1) What is the HP of your AC water pump?

2) How old is your.

The solar pump inverter is an off-grid inverter that doesn't rely on the grid and operates independently of the load. The traditional off-grid inverter requires a battery, which costs about 30% of the system's cost. The system has a life span of only 3-5 years, which can affect your ROI. But these.
