# Can individuals participate in the 2025 energy storage project

## Overview

---

On February 20, 2025, the Federal Energy Regulatory Commission (FERC) approved PJM's proposal to eliminate the categorical exemption for intermittent renewable and energy storage assets to participate in its capacity market.

On February 20, 2025, the Federal Energy Regulatory Commission (FERC) approved PJM's proposal to eliminate the categorical exemption for intermittent renewable and energy storage assets to participate in its capacity market.

On February 20, 2025, the Federal Energy Regulatory Commission (FERC) approved PJM's proposal to eliminate the categorical exemption for intermittent renewable and energy storage assets to participate in its capacity market. This ruling takes effect immediately and requires all existing solar.

The One Big Beautiful Bill Act (OBBA) is set to dramatically reshape how grid scale and residential energy storage systems are treated under federal tax law. The new budget package revises critical incentives laid out by the IRA, focusing particularly on foreign sourcing restrictions, new domestic.

The California Public Utilities Commission's (CPUC) Self-Generation Incentive Program (SGIP) offers incentives for installing energy storage and paired solar technology at low-income households. To support customer resiliency and grid reliability, the CPUC has authorized funding of \$280 million for.

This funding will focus on non-lithium technologies, long-duration (10+ hour discharge) systems, and stationary storage applications. In September 2024, DOE announced up to \$100 million in funding to support pilot-scale energy storage demonstration projects. For the first stage of this process.

The 2025 national energy storage policy affects everyone from EV owners to solar panel enthusiasts. This isn't just government jargon; it's about how we'll keep the lights on in an era of climate chaos. Imagine energy storage incentives as "free toppings" on the pizza of renewable energy. The new.

EASE is currently involved in many EU-funded projects. is proud to launch its tenth annual Student Award recognising outstanding graduate student research in the field of energy storage! 07.04.2025 / News . Members benefit from EASE''s expertise and technical know-how, and they can participate.
