# Can pull outdoor power supply

## Overview

---

For those in need of power outdoors for a short time, such as to trim your bushes, power a bounce house for your kid's birthday, or provide lighting for a party, an extension cord will get the job done for.

How do I get power outside with an outlet?

Disconnect the power supply to the two areas and proceed by: And reconnecting the supply. I will go into more detail below. The quickest way to get power outside with an outlet is to install one that is back-to-back with an interior one inside your home. The only barrier will be the wall so that you can drill a hole from one end to the other.

How do you run power outdoors?

Mr. Electric outlines the safest methods for running power outdoors. Plan your route and power needs. Use weatherproof, outdoor-rated conduit and wiring. Dig trenches for underground cables, following local codes. Install GFCI outlets for safety. Test the system before use. Test the system before use. Looking to 'amp up' your outdoor experience?

.

Do I need a GFCI outlet if I run power outside?

When running power outside, a GFCI-equipped outlet ensures safety, and is required by code in all areas exposed to moisture, like the outdoors. When adding an outdoor outlet, be sure to choose an outdoor-rated, weatherproof model with built-in, high-sensitivity GFCI.

What do you need to install a power outlet?

You will need a power drill, a hammer, pliers, a screwdriver, and a wire cutter to drill the hole. You will need a new power outlet, conduit (or pipe), cable, wire nuts, and electrical tape. The wires in the cable are typically 12/2 for a 20-amp circuit.

Do you need a cover for a power outlet?

Install the cover to protect the exterior outlet from the elements (rainwater, dust, etc.). The outlet and its weatherproof cover should be securely fixed to the external wall. Only reconnect the power when you're sure you've completed the wiring and done it properly.

How do I Choose an outdoor outlet?

When adding an outdoor outlet, be sure to choose an outdoor-rated, weatherproof model with built-in, high-sensitivity GFCI. Whether single or duplex, all exterior outlets should have spring-loaded covers to protect them from weather, pests, dirt, and most importantly moisture.
