Alphabet's Google signed an agreement with the Chilean government on Wednesday to build a submarine fibre-optic cable that will connect South America with Asia and Oceania. In an effort to boost South America's digital connectivity, the Humboldt cable is a 14,800-kilometre undersea infrastructure.

Google announced today that Google is joining Desarrollo País of Chile and Office of Posts and Telecommunications of French Polynesia (OPT) to build Humboldt, a subsea cable route linking Chile, French Polynesia, and Australia — the first ever to directly connect South America and Asia-Pacific.

Santiago-Valparaíso train (US\$3.28bn) – This passenger and freight rail project will connect the Metropolitan Region with the Valparaíso Region and consists of 2 stages. The first stage extends from Quinta Normal to El Salto in the Valparaíso Region. Between Quinta Normal and Limache, the existing.

Today, we're joining Desarrollo País of Chile and Office of Posts and Telecommunications of French Polynesia (OPT) to announce Humboldt, a subsea cable route linking Chile, French Polynesia, and Australia — the first ever to directly connect South America and Asia-Pacific. When operational.

A communication tower in Chile is a critical piece of modern infrastructure. Chile is defined by its unique geography. It is a long, narrow country with incredibly diverse climates. These range from the world's driest desert in the north to glacial regions in the south. This geography presents.

The "Humboldt Project" will connect Chile to Australia with a 14,800-kilometer cable and improve connectivity. Other South American countries, such as Argentina, Paraguay and Brazil are also expected to benefit. Google reportedly invested somewhere between \$300 million and \$550 million in the. Where will space stations be built in Chile?

Space stations will also be built in Antofagasta, Santiago and Punta Arenas to monitor the data transmitted by the satellites, which will allow Chile to receive a greater range of images more frequently and at a lower cost.

Will Chile build a fiber optic cable to South America?

Climate Summit, in Baku, Azerbaijan, Nov. 20, 2024. (AP Photo/Sergei Grits, File).

Will Chile become a major digital hub?

(AP Photo/Jeff Chiu, File) SANTIAGO, Chile (AP) — Google signed an agreement with Chile on Wednesday to deploy an undersea fiber optic cable connecting South America with Asia and Oceania, a first-of-its-kind project that aims to cement the South American country's status as a major digital hub.

How has Chile improved its infrastructure?

Conclusion Chile has seen significant improvements in its infrastructure over the past few decades, largely driven by its successful public-private partnership concession model. These improvements have elevated Chile's global competitiveness, streamlined trade, enhanced public services, and promoted economic growth.

Does Google have a subsea cable to Chile?

In addition to the Humboldt subsea cable connecting Chile to Australia and French Polynesia, Google has invested its private subsea cable Curie, connecting Chile to the United States and Panama.

Does Google have a data center in Chile?

Chile, home to one of Google's largest data centers in Latin America, is currently connected to the United States and the rest of the region via an

undersea cable. This cable also provides Chile with a longer route to other continents.
