Commercial solar energy storage power station in Portugal

Overview

Why is Portugal launching a solar energy storage project?

This initiative aims to enhance the flexibility and stability of Portugal's power supply system amid its record-breaking solar electricity production. On July 31, the ministry announced the allocation of €99.75 million through a call for tenders to install energy storage projects totaling 500 MW.

What is the largest photovoltaic plant in Portugal?

The Central Fotovoltaica Riccardo Totta, named after the father of the owner of the land on which it sits, is now Portugal's largest photovoltaic plant, producing 219 Megawatts of power. It was inaugurated in October 2021 and was developed by WElink Energy/Solara4 in partnership with China Triumph International Engineering Company.

Are there solar farms in Portugal?

As it stands, there are a number of large and medium-scale solar "farms" in operation globally. Portugal has a particularly ambitious plan to overhaul its energy production, and is already home to a number of exciting projects to support this.

How many solar panels are installed in Portugal?

The entire work cost more than 250 million with more than 376,000 solar panels, the power plant has a capacity of 62 MWp. On fixed structures, approximately 190,000 panels are installed, while 52 thousand Euro worth panels are installed on single-axis trackers. In Portugal, Galp begins construction on its first large-scale solar PV installation.

How much solar energy does Portugal need?

(Updated October 2024) Solar energy is becoming a more important part of the Portuguese energy mix. Solar installed capacity reached 1.03 GW by the end of 2020, accounting for 3.6 percent of the total production of power.

Portugal established a target of 6.4 gigawatts of installed capacity by 2023, with a goal of 9 gigawatts by 2030.

Will Cercal power build a solar plant near Alentejo?

Cercal Power has launched plans to build a major solar plant around a kilometer from Cercal do Alentejo. With panels covering 137.05 hectares and featuring 553,722 photovoltaic modules, the plant is predicted to produce 596,206-megawatt hours per year.
