Communication Engineering Transmission Base Station

Overview

A base transceiver station (BTS) or a baseband unit (BBU) is a piece of equipment that facilitates between (UE) and a network. UEs are devices like (handsets), phones, computers with connectivity, or antennas mounted on buildings or telecommunication towers. The network can be that of any of the wireless communication technologies like , , , , or other

A base station is a fixed transceiver that serves as the central communication point for mobile devices within a defined geographical area, known as a cell. It is sometimes called a cell tower. Its function is to transmit and receive radio signals to and from wireless client devices.
