Overview

Is a 600 MWp solar plant being built in Congo?

Sun Plus, a unit of The Sandi Group (TSG), has launched construction work on a 600-MWp solar plant in the Democratic Republic of Congo that is part of an even larger project totalling 1 GWp. The two-phase scheme, known as the Kinshasa Solar City, includes the installation of a number of solar photovoltaic (PV) parks near the capital of the country.

What is the standard voltage in Congo-Kinshasa?

In Congo-Kinshasa, the standard voltage is 220 V. You will need a voltage converter to use your electric appliances there, because the standard voltage in Congo-Kinshasa is higher (220 V) than in the United States (120 V). Using your appliances without a converter could cause damage.

What is Kinshasa Solar City?

The two-phase scheme, known as the Kinshasa Solar City, includes the installation of a number of solar photovoltaic (PV) parks near the capital of the country. The 600-MWp phase one was initiated on August 19 and is expected to be completed within a year.

Where is Kinshasa Solar City solar farm located?

Kinshasa Solar City solar farm is an announced solar photovoltaic (PV) farm in Menkao, Maluku Commune, Tshangu District, Kinshasa, DR Congo. Read more about Solar capacity ratings . The map below shows the approximate locations of the solar farm phases:.

How much will Snel pay for a solar plant?

The solar plant will be supported by a 25-year power purchase agreement (PPA) with Societe nationale d'electricite (SNEL) under which the state-owned utility will buy the facility's entire output at USD 0.095 per kWh, local media say. (USD 1.0 = EUR 0.846)
