

Kongres Container

Containerized lead-acid batteries

Overview

The BTS Container is designed for used lead acid batteries to be collected from the “coal face”, the Used Battery Generators, and be delivered directly to the Battery Recycling Facilities, where the used batteries can be automatically unloaded.

The BTS Container is designed for used lead acid batteries to be collected from the “coal face”, the Used Battery Generators, and be delivered directly to the Battery Recycling Facilities, where the used batteries can be automatically unloaded.

UNISEG’s Battery Transport & Storage (BTS) Container was specifically designed for the safe, environmentally sustainable and efficient storage and transportation of used car batteries and other lead acid batteries. The BTS Container eliminates many of the short comings of the current methods used.
