# Cote d Ivoire energy storage and new energy prices

## Overview

---

Is Côte d'Ivoire a renewable country?

By 2030 Côte d'Ivoire aims for renewables to represent 45% of the power mix and GHG emissions to decrease by 30% relative to a BAU scenario. Eranove, through CIE, CIPREL and Atinkou, dominates power generation with a share of 39%. Around 80% of natural gas is produced by Foxtrot, while CNR accounts for around 70% of crude oil output.

Does Cote d'Ivoire have biomass?

Traditional biomass – the burning of charcoal, crop waste, and other organic matter – is not included. This can be an important source in lower-income settings. Cote d'Ivoire: How much of the country's electricity comes from nuclear power?

Nuclear power – alongside renewables – is a low-carbon source of electricity.

What is happening in Côte d'Ivoire?

Côte d'Ivoire is a net exporter of electricity and oil products. Biomass continues to dominate Côte d'Ivoire's energy mix (56%). Diesel and electricity prices remain subsidised. A 112 MW hydropower plant is due to be commissioned in 2026. Eni is expected to start the third phase of its Baleine oil & gas project in 2026.
