## Overview

---

In an interview published by the official newspaper Granma, the Minister of Energy and Mines, Vicente de la O Levy, admitted that, although "the first storage containers" have already arrived in the country, the necessary batteries for storage have not yet been installed.

In an interview published by the official newspaper Granma, the Minister of Energy and Mines, Vicente de la O Levy, admitted that, although "the first storage containers" have already arrived in the country, the necessary batteries for storage have not yet been installed.

The plan aims for one thousand megawatts of solar energy by 2025, but without installed batteries, which prevents meeting nighttime demand and limits its effectiveness against persistent blackouts. The Cuban government announced that it plans to incorporate one thousand megawatts (MW) of solar.

In the midst of a complex energy crisis and with fuel deficits affecting electricity generation, the Cuban government announced that it will begin the marketing of solar panel systems presumably in national currency for housing. The measure seeks to ease the burden on the National Electricity.

The Cabaiguán photovoltaic park, with a capacity of 21.87 MW, located in the central province of Sancti Spíritus, began operations after just over two months of installation. This is part of Cuba's national plan that calls for the construction of 55 solar parks by 2025, each with a capacity of 21.8.

HAVANA TIMES – On February 21, 2025, the first solar photovoltaic park was inaugurated, with a capacity of 21.8 MW. The project, located in Cotorro—on the outskirts of Havana—is part of the island's government's bet on solar energy to address the country's dire electricity situation. According to.

How does 6Wresearch market report help businesses in making strategic decisions?

6Wresearch actively monitors the Cuba Smart Solar Power Market and
