Cyprus Energy Storage Plan 2025

Overview

The first call will run from February 14 to March 28, 2025 and interested parties need to apply electronically. The primary goal of the new subsidy scheme, argues the ministry, is to reduce the cost of electricity on the island.

The first call will run from February 14 to March 28, 2025 and interested parties need to apply electronically. The primary goal of the new subsidy scheme, argues the ministry, is to reduce the cost of electricity on the island.

Cyprus' Ministry of Energy, Commerce and Industry has launched a subsidy scheme for energy storage systems that can be added alongside existing renewable energy plants. Eligible renewable power plants should be remunerated either by feed-in tariffs (FiTs) or net billing systems. Cyprus has.

The energy regulator has approved a significant battery storage system totalling 120MW across three locations to enhance grid stability and security, marking a crucial step for the island's electricity infrastructure. The Cyprus Energy Regulatory Authority (CERA) on Wednesday granted approval to.

Cyprus aims to complete energy storage system by 2026, launch competitive electricity market in 2025, KNEWS CLOSE Loading. TRENDING

Cyprus is set to expand its energy infrastructure with new storage facilities and power generators, Giorgos Petrou, president of the Cyprus energy regulatory authority (Cera) confirmed on Wednesday. According to a report on StockWatch, Petrou revealed that an additional proposal is under review for.

In May 2025, Cyprus brought its first significant battery energy storage system (BESS) online. The project marks a major step toward enhancing the country's energy infrastructure, aligning with its goals for renewable energy integration and grid stability. The BESS project is a partnership between.

Applications for participation in the scheme will be accepted from January 15,

2025. The Council of Ministers, the executive branch of the Cypriot government, has approved the nation's funding plan for energy storage systems installed in conjunction with renewable energy plants which had been.
