The short answer is solar panels might increase your home's value in the long run, though. Here's how. According to a Zillow study, installing solar panels can increase your home's value by about 4%. The exact amount depends on location, energy savings and solar appeal to potential buyers. Homes.

Your home could be worth more with solar panels, but how much more depends on location and if you own the panels. Some or all of the mortgage lenders featured on our site are advertising partners of NerdWallet, but this does not influence our evaluations, lender star ratings or the order in which.

It's been proven that solar panels can help you save on your electricity bills - but can they add value to your home, too?

Our experts found that homes with solar panels sold for about 6.9% more on average than homes without solar in SolarReviews' 2025 solar home value study. But, how much solar.

Yes, solar panels increase home value in most cases. The demand for homes with solar energy has grown significantly as more homeowners become environmentally conscious and electricity rates continue to rise. The increase in home value depends on your location, local utility rates, and other factors.

Despite common misconceptions, rooftop solar could make your home more valuable -- and quicker to sell. Solar panels can appeal to potential buyers for your home, but they can also make the selling process more complicated. So

you want to put solar panels on your roof, but you're not sure if you'll.

As solar energy becomes more accessible and affordable, many homeowners are asking a key question: Do solar panels increase home value?

And if they do, by how much?

The short answer is yes—solar panels can increase the resale value of your home, especially when installed by a reputable company and.
