# EU solar module cost price

## Overview

---

The updated guide to photovoltaic module prices shows the latest costs of solar panels across Europe. In August, high-efficiency modules dropped to €0.12 per watt, marking an all-time low for the sector. Prices for photovoltaic modules in 2024 continue to fall.

The updated guide to photovoltaic module prices shows the latest costs of solar panels across Europe. In August, high-efficiency modules dropped to €0.12 per watt, marking an all-time low for the sector. Prices for photovoltaic modules in 2024 continue to fall.

Every month we publish a current price index on the development of wholesale prices of solar modules. In doing so, we differentiate between the main technologies available on the market. Since 2009, pvXchange has provided a unique price index for the European market, which has become an invaluable.

The updated guide to photovoltaic module prices shows the latest costs of solar panels across Europe. In August, high-efficiency modules dropped to €0.12 per watt, marking an all-time low for the sector. Prices for photovoltaic modules in 2024 continue to fall. According to the monthly index.

Note: Data is expressed in constant 2024 US\$ per watt.

[OurWorldinData.org/energy](https://OurWorldinData.org/energy) | CC BY IRENA presents solar photovoltaic module prices for a number of different technologies. Here we use the average yearly price for technologies 'Thin film a-Si/u-Si or Global Price Index (from Q4 2013)'. This.

Solar module prices reached a new low this week, says Leen van Bellen, business development manager Europe for Search4Solar, a European purchasing and selling platform for solar products. He tells pv magazine that prices will remain low in the short term. Search4Solar, a European platform for.

Solar module prices in Europe have risen after months of decline, driven by price increases from Chinese manufacturers and a tight supply of popular

modules in the European market. The January edition of the PV.index report from European solar trading platform Sun.store showed that n-type.

The cost of a solar cell in the EU typically ranges from €300 to €500 per installed kilowatt (kW), varying based on factors such as technology type, scale of installation, and regional differences, 1. Solar Panel Prices in Europe, 2. Factors Influencing Costs, 3. Cost Variations by Country, 4. How much does a solar module cost in Europe?

Search4Solar, a European platform for buying and selling solar panels, inverters, and batteries, received a record-low PV module price this week at €0.055 (\$0.058) /W. “ This is the first time the €0.06/W threshold was surpassed,” Leen Van Bellen, business development manager Europe at Search4Solar told pv magazine.

Are solar module prices at the lowest point in Europe?

Surpassing the €0.06/W threshold may indicate that solar module prices in the European market have hit their lowest point. “ This is the bottom in the EU,” Van Bellen said. “The next step could be shipping back the products to China or selling them in Africa.”.

Are solar module prices a new low?

Solar module prices reached a new low this week, says Leen van Bellen, business development manager Europe for Search4Solar, a European purchasing and selling platform for solar products. He tells pv magazine that prices will remain low in the short term.

Why did solar module prices rise in May 2025?

In May 2025, shifting market dynamics saw solar module prices continue to rise, with supply constraints and firm demand putting upward pressure on pricing. In contrast, inverters trended lower, highlighting diverging developments across the PV value chain.

Is the European solar market in motion?

Expert analysis: the solar market in motion With a PMI of 70 and tightening module supplies, the European solar market stands at a pivotal moment. Rising prices for P-type and Full Black modules, driven by diminishing inventories, suggest supply constraints will linger into Q3, especially as global demand intensifies.

How much does a tunnel oxide passivated contact solar module cost?

According to the most recent update from OPIS, tunnel oxide passivated contact (TOPCon) solar module prices ranged from a low of €0.080/W to a high of €0.120/W last week, with the average price being €0.101/W. This content is protected by copyright and may not be reused.
