East Timor New Energy and Energy Storage Integration

Overview

Is East Timor interested in solar power?

East Timor President José Ramos-Horta told The Associated Press in an interview in Dili last week that his country is interested in exploring various types of renewable energy sources, including wind, sea and especially solar power. “We have plenty of sun,” he said, adding that the cost of solar technology continues to fall.

Can East Timor transition its energy sector?

(AP Photo/Firdia Lisnawati) Still, East Timor’s government has expressed interest in transitioning its energy sector. In 2020, it hired energy consultants to conduct a feasibility study for supplying natural gas to the three power plants.

Why is East Timor struggling to overcome its dependence on diesel?

East Timor, a small country in Southeast Asia, is struggling to overcome its heavy dependence on diesel despite significant commitments to renewable energy. Although the government has promised to promote wind, solar, and hydropower, the transition remains slow.

Does East Timor need a power plant?

East Timor’s current power plants, which were built with large investments from the government in recent decades, can also produce far more electricity than the country demands, lowering the imperative for the country to switch systems, Heynen said. Still, East Timor’s government has expressed interest in transitioning its energy sector.

Is East Timor at an energy development crossroads?

development crossroads.

What is East Timor electrification masterplan 2025?

The overall objective of this project is to develop, for the Government of East Timor, the Electrification Masterplan 2025 of East Timor based on Renewables Energies. The East Timor Renewable Energy Electrification Plan consists on the thorough analysis of wind, solar and hydro resources (including wind measurement stations installation).
