Energy Storage Product Quotes

Overview

Is energy storage a critical asset?

Layer in heightened demand from broad electrification and data centers (especially AI workloads that run 24/7, which is expected to quadruple by 2030), and energy storage is now seen as a critical asset. Its investment thesis breaks down into two interconnected waves: The first is the buildout of grid-scale batteries.

Where can energy storage be used for capacity services?

Markets are increasingly seeking energy storage for capacity services (including through capacity markets). Japan, Poland, the UK, Chile, the US Southwest, New York and Australia are new markets opening up these opportunities.

What is long-duration energy storage (LDEs)?

In the U.S., the EIA expects ~18.2 GW of new utility-scale storage in 2025 (up from ~10.3 GW in 2024)—making storage one of the fastest-growing categories of grid capacity. The second, and perhaps larger, opportunity is Long-Duration Energy Storage (LDES). If 4-hour batteries solve the daily mismatch, LDES solves the weekly or seasonal one.

Will 9% of energy storage capacity be added by 2030?

We added 9% of energy storage capacity (in GW terms) by 2030 globally as a buffer. The buffer addresses uncertainties, such as markets where we lack visibility and where more ambitious policies may develop that we haven't predicted. We revised our buffer calculation methodology in this market outlook.

What makes CATL a great EV & battery storage supplier?

As the global storage buildout continues, CATL's sheer scale, relentless cost-down engineering, and system-level integration make it a default hardware

supplier for a significant portion of the planet's energy infrastructure. HQ: China; Vertically integrated EV and battery storage powerhouse.

What is fluence energy storage?

Fluence is the quintessential pure-play energy storage integrator, a joint venture born from the industrial might of Siemens and the utility expertise of AES. It exists to solve the complexity of deploying large-scale storage projects, offering turnkey solutions that are trusted and bankable.
