# Energy storage battery factory opens

## Overview

---

U.S. carmaker Tesla's new Megafactory in Shanghai, dedicated to manufacturing its energy-storage batteries, known as Megapacks, launched production on Tuesday, marking a significant expansion of the company's presence in China. What is EVE Energy's new battery factory?

December 2024 EVE Energy has opened the first production phase of a battery factory in the city of Jingmen in China's Hubei province. The facility is expected to reach an annual production volume of 60 gigawatt-hours. EVE Energy claims that the factory producing cells for energy storage systems is the largest of its kind worldwide.

Are battery cells the future of energy storage?

In the energy storage industry, both systems and battery cells are expanding at an astonishing pace. While the global market is rapidly adopting the 300Ah+ battery cells primarily based on 314Ah, research and mass production of the next-generation 500Ah+ large-capacity battery cells are already in full swing.

Where is Tesla launching a new battery factory in China?

Tesla launched a new \$200m battery factory in Shanghai, expanding its footprint in China even as tensions escalated between Washington and Beijing over trade. The Megapack facility, located near Tesla's existing carmaking Gigafactory in the Lingang Free Trade Zone, is its first energy storage gigafactory outside the US.

How big is Eve energy's energy storage plant?

The facility is expected to reach an annual production volume of 60 gigawatt-hours. EVE Energy claims that the factory producing cells for energy storage systems is the largest of its kind worldwide. According to the company, manufacturing at the site is entirely automated.

Where is EVE Energy based?

On December 10th, EVE Energy's first phase of the 60GWh Super Energy Storage Factory, Mr. Big, officially commenced operations in Jingmen, Hubei. By the end of the third quarter of 2024, EVE Energy's global energy storage battery cell shipment volume has firmly secured the top 2 position.

What is EVE Energy's 60gwh super energy storage factory?

To support the mass production of Mr. Big's large battery cells, EVE Energy's 60GWh Super Energy Storage Factory officially commenced operations on December 10th. EVE Energy has established a virtual factory leveraging digital twin technology, creating a super intelligent factory that integrates automation, digitization, and low-carbon processes.
