

## Kongres Container

# Energy storage cabinet pcs power supply price

LIQUID/AIR COOLING

INTELLIGENT INTEGRATION

PROTECTION IP54/IP55

BATTERY /6000 CYCLES

## Overview

---

Typical prices range from \$200/kW to \$350/kW, but exact quotes depend on project specifications, shipping terms (EXW, FOB, CIF), and order volume. How to Select PCS for Your Project?

When selecting a PCS, consider the following: Application Scenario: Residential, commercial, or grid-scale?

What is coepo series PCs 100kW power conversion system for energy storage system?

1. Overview CoEpo Series PCS 100KW Power Conversion System for Energy Storage System is a modular design, with a three-level topology, bidirectional AC/DC, and DC/AC conversion to meet the needs of energy storage systems.

Why should you choose an energy storage hybrid PCs cabinet?

Reliability: STS ensures uninterrupted power supply during grid transitions.  
Scalability: Modular design allows easy expansion as energy needs grow. The Energy Storage Hybrid PCS Cabinet empowers businesses and industries to achieve sustainable energy management while adapting to changing operational demands.

What is a power conditioning system (PCS)?

Delta's Power Conditioning Systems (PCS) are bi-directional inverters designed for energy storage systems. Ranging from 100 kW to 4 MW, our PCS comply with global certifications and seamlessly integrate with major battery brands and various battery technologies.

What is a liquid cooled battery energy storage system?

The system consists of: Ready to install liquid-cooled battery energy storage system with one (2-hour version) or two (4-hour version) battery cabinets, and a PCS cabinet. Liquid cooling provides two years longer battery service life and 15% higher discharge capacity, while maintaining less than 2.5 degree C

delta between cells.

Can a 100kW PCS be integrated with a photovoltaic (PV) system?

100kW PCS can be integrated with photovoltaic (PV) systems to maximize the efficiency of renewable energy utilization. (1), Seamless Switching Between Grid-Connected and Off-Grid Modes -Grid-connected mode: During the day, solar energy is stored or fed into the grid, while stored energy can be used at night to reduce dependence on the grid.

Why should you choose a battery based energy storage system?

By sourcing batteries separately, users can expand their energy storage capacity as needed without overhauling the entire system. This scalability makes it an ideal solution for both residential and light commercial applications, future-proofing investment and enabling smart energy management.
