Energy storage power station under construction in Saudi Arabia

Overview

Saudi Arabia is constructing the world's largest solar-storage microgrid, a 400-MW solar project backed by 1.3 GWh of energy storage, to power the Red Sea Project on the Kingdom's west coast.

Saudi Arabia is constructing the world's largest solar-storage microgrid, a 400-MW solar project backed by 1.3 GWh of energy storage, to power the Red Sea Project on the Kingdom's west coast.

Saudi Arabia is rapidly emerging as one of the world's largest markets for battery energy storage systems (BESS), with over 6.2 GW of upcoming capacity and a long-term target of 48 GWh by 2030. The Kingdom has already tendered more than 26 GWh of storage projects, with over 6 GW under construction.

According to TrendForce, amidst the global energy transition, Saudi Arabia is accelerating the realization of its renewable energy strategic goals. Under the supervision of the Ministry of Energy, the Saudi Electricity Company (SEC) has announced the launch of the second phase of its battery energy.

Updated August 29, 2025: Saudi Arabia is making advances in its BESS projects as it launches one of Middle East's largest BESS deployments, a 4GWh BESS project. The nation's battery storage drive comes as HiTHIUM is commissioned with a 4 GWh BESS project in a joint venture between the Saudi.

The 2 GWh battery energy storage system (BESS) features 122 prefabricated storage units, designed and supplied by China's BYD. Saudi Arabia has officially connected its largest battery energy storage system (BESS) to the grid, marking a significant milestone in the country's renewable energy.

A 2GWh battery energy storage system (BESS) project has gone into operation in Saudi Arabia, according to the engineering, procurement and construction (EPC) firm which delivered it. PowerChina Hubei Engineering, a subsidiary of the Power Construction Corporation of China (PowerChina) said last.

Saudi Arabia has solidified its position among the world's top ten battery energy storage markets, marked by the commissioning of the 500 MW/2,000 MWh Bisha Battery Energy Storage System in the southwestern province of 'Asir. This facility stands as one of the largest energy storage projects in the.
