# Energy storage projects sold at a premium

## Overview

---

What's happening in the energy storage sector in 2023?

A roundup of the biggest projects, financing and offtake deals in the energy storage sector that we have reported on this year. It's been a positive year for energy storage in 2023, with new markets opening up and supply chain bottlenecks and price spikes for battery energy storage systems (BESS) easing, though challenges remain.

Is 2023 a good year for energy storage?

It's been a positive year for energy storage in 2023, with new markets opening up and supply chain bottlenecks and price spikes for battery energy storage systems (BESS) easing, though challenges remain. A roundup of the biggest projects, financing and offtake deals in the sector that Energy Storage News has reported on this year.

What drives energy storage project development?

Globally, energy storage project development is increasingly driven by the utility-scale segment, with mandates and targeted auctions driving gigawatt-hour projects in markets like China, Saudi Arabia, South Africa, Australia and Chile.

How many energy storage projects are there in the world?

It has 9.4GW of energy storage to its name with more than 225 energy storage projects scattered across the globe, operating in 47 markets. It also operates 24.1GW of AI-optimised renewables and storage, applied in some of the most demanding industrial applications.

What is Europe's largest battery storage project?

It was billed as Europe's largest battery storage project when it became operational at the end of 2014 and was revolutionary thanks to its technology providing a range of benefits to the wider electricity system, including

absorbing energy then releasing it to meet demand. 6. Fluence Advancion Energy Storage Systems.

What is energy storage technology?

Energy storage technology allows for a flexible grid with enhanced reliability and power quality. Due to the rising demand for energy storage, propelled further by the need for renewable energy supply at peak times, energy storage facilities and producers have grown tremendously in recent years.
