# Eritrea Energy Storage solar Project

## Overview

---

Where is Eritrea's first solar plant?

The government of Eritrea has received a \$49.92 million grant from the African Development Bank to fund a 30 MW photovoltaic plant in the town of Dekemhare, 40 km southeast of the capital Asmara. It will be the country's first large-scale solar plant.

Where can I find information on renewable power capacity & generation of Eritrea?

You can find information on the renewable power capacity and generation in Eritrea on the homepage of IRENA.org. Climatescope 2019 lists the clean energy policies and investments for Eritrea.

What is Eritrea's 2030 target for renewable energy?

Eritrea aims to supply 20% of electric power demand through renewable energy sources by 2030. The African Development Bank funding will help the country in achieving this target.

Where can I find information about energy in Eritrea?

You can find information on energy production, total primary energy supply, electricity consumption, and CO2 emissions for Eritrea on the IEA homepage. For data on energy access (access to electricity, access to clean cooking, renewable energy, and energy efficiency) in Eritrea, visit the Tracking SDG7 homepage.

How will the grant help the Eritrean power sector?

The grant will improve the operational performance of the grid and ensure the sustainability of the results achieved and the overall development of the Eritrean power sector. Part of the grant will also be allocated to technical assistance and capacity building.

Who is responsible for electricity supply in Eritrea?

The Ministry of Energy and Mines is responsible for electricity supply in Eritrea. The Government of Eritrea is the beneficiary of the grant, and the Ministry is responsible for its implementation.
