Estonian energy storage vehicle prices

Overview

The Baltic Storage Platform joint venture, formed by Corsica Sole, Evecon, and Mirova, has secured €85.6 million in financing for two large-scale battery energy storage projects in Estonia, Hertz 1 and Hertz 2.

The Baltic Storage Platform joint venture, formed by Corsica Sole, Evecon, and Mirova, has secured €85.6 million in financing for two large-scale battery energy storage projects in Estonia, Hertz 1 and Hertz 2.

The Baltic Storage Platform raised €85.6 million to build Estonia's 200 MW / 400 MWh Hertz 1 and Hertz 2 battery projects. The deal marks the Baltics' first storage-only financing, strengthening energy security and renewable integration under the EU InvestEU programme. The Baltic Storage Platform.

The Baltic Storage Platform joint venture – bringing together French independent solar power producer Corsica Sole, Estonia's leading renewable energy developer Evecon, and Mirova, an affiliate of Natixis Investment Managers dedicated to sustainable investment – has successfully secured €85.6.

Baltic Storage Platform JV—a French-based independent solar power company, Corsica Sole, and Estonian major renewable energy developer Evecon, alongside Mirova, a group of the Natixis Investment Managers that specializes in sustainable investments—managed to finance the two battery energy storage.

Joint venture Baltic Storage Platform has secured €85.6mn (\$90.7mn) to build two energy storage systems in Estonia, forming one of continental Europe's largest battery complexes. Estonian state-owned energy company Eesti Energia has inaugurated the nation's largest battery energy storage facility at the Auvere industrial complex in Ida-Viru County. The 26.5 MW/53.1 MWh system was developed to boost the stability of the regional electricity grid and mitigate high peak.

The Baltic Storage Platform (BSP) has secured EUR 85.6 million (USD 99.6m) from a group of European financial institutions to support the Hertz 1 and Hertz 2 battery energy storage system (BESS) projects in Estonia, which have a combined capacity of 200 MW/400 MWh. Energy storage battery. Photo by. Where is Estonia's largest battery storage facility located?

The flagship battery storage project commenced operations on February 1, only days before cutting ties with the Russian power grid. Estonian state-owned energy company Eesti Energia has inaugurated the nation's largest battery energy storage facility at the Auvere industrial complex in Ida-Viru County.

How much PV capacity does Estonia have?

According to Andres Meesak, CEO of Estonia's PV association, Estonia now has around 107 MW of cumulative installed PV capacity. This represents a significant increase from the 17 MW of cumulative capacity at the end of 2017.

How much does it cost to charge an EV in Estonia?

Each Estonian town, as well as bigger villages now have their own fast chargers; the stations installed along highways maintain a minimum distance of 40 to 60 km. The EV users have three service packages to choose from, the cost of one charging is between 2.5 and 5 euros.

What is Estonia's Auvere Bess project?

Estonia's Auvere BESS project is designed to participate in both the electricity exchange and other energy markets to ensure the security of electricity supply. According to Eesti Energia board member Kristjan Kuhi, the battery is able to respond very effectively to fluctuations in the power system.

Who delivered the Eesti Energia project?

The project was delivered by energy solutions system integrator Diotech Group, which won Eesti Energia's international tender in 2023. It was supplied with battery technology from LG Energy Solution. Installation and connection work were carried out by Enefit Solutions.
