Europe 250 solar panels generate electricity

Overview

In June 2025, solar was the largest source of EU electricity for the first time, with multiple countries producing record amounts of solar power. Wind power in the EU started the summer strongly, with the highest ever generation for the months of May and June.

In June 2025, solar was the largest source of EU electricity for the first time, with multiple countries producing record amounts of solar power. Wind power in the EU started the summer strongly, with the highest ever generation for the months of May and June.

The Netherlands and Greece were the top solar record setters, while wind power also hit new highs in May and June. In an historic first, solar power generated more electricity than any other source in the EU last month. New data from energy think tank Ember shows that solar accounted for 22.1 per.

In a historic milestone for clean energy, solar power became the leading source of electricity in the EU for the first time in June 2025. New data from energy think tank Ember reveals that solar accounted for 22.1% of the EU's electricity mix, surpassing nuclear and leaving fossil fuels far behind.

More than half of the European Union's (EU) electricity came from renewables in the second quarter of 2025, and solar is leading from the front. According to new data from Eurostat, renewable energy sources generated 54% of the EU's net electricity in Q2 2025, up from 52.7% year-over-year. The.

Solar became the EU's largest source of electricity for the first time in June 2025. National records for solar and wind rolled in across EU countries in May and June, pushing coal to an all-time low. In June 2025, solar was the largest source of EU electricity for the first time, with multiple.

European solar electricity generation reached nearly 68 terawatt-hours (TWh) in the first three months of 2025. The rise in solar power is part of Europe's broader strategy to reduce reliance on fossil fuels and shift towards clean energy. Credit: lovelyday12 / Shutterstock. Europe is on track to.
