Minety, England, August 4, 2021 /PRNewswire/ -- Europe's largest energy storage project, the 100MW/100MWh Minety plant with Sungrow's 1500V energy storage system solutions has been successfully grid-connected, designed for facilitating grid stability and maximizing the utilization of renewable energy.

In mid-July, the 100MW /100MWh Minety battery energy storage system (BESS) was completed in Wiltshire, southern England. It is claimed to be the largest project of its kind in Europe, although another project of a similar size in England, Capenhurst, is also now underway and another 100MW battery project.

In Vilvoorde, on the outskirts of Brussels, Belgium, mainland Europe's largest battery energy storage system has reached a major milestone. Energy giant Engie and global leading energy storage system provider Sungrow announced this week that the first phase of the 200MW/800MWh energy storage.

Europe's largest energy storage project, the 100MW/100MWh Minety plant with Sungrow's 1500V energy storage system solutions has been successfully grid-connected. The UK experienced the most debilitating blackout in nearly a decade in August 2019. The incident exposed the serious lack of frequency.

In mid-July, the 100MW / 100MWh Minety battery energy storage system (BESS) was completed in Wiltshire, southern England. It is claimed to be the largest project of its kind in Europe, although another project of a similar size

in England, Capenhurst, is also now underway and another 100MW battery.
