Georgia Hybrid Energy Storage Battery Project

Overview

Georgia Power announced today that construction is underway on 765-megawatts (MW) of new battery energy storage systems (BESS) strategically located across Georgia in Bibb, Lowndes, Floyd and Cherokee counties.

Georgia Power announced today that construction is underway on 765-megawatts (MW) of new battery energy storage systems (BESS) strategically located across Georgia in Bibb, Lowndes, Floyd and Cherokee counties. The BESS projects were authorized by the Georgia Public Service Commission (PSC) through.

Georgia Power hosts company and project leaders, as well as local and state elected officials, for a groundbreaking ceremony at the McGrau Ford Battery Facility in Cherokee County on April 4. This 530-megawatt battery energy storage system will consist of two phases, approved in the 2022 Integrated.

In a continued effort to limit its use of fossil fuels to mitigate peaks, Georgia Power Company is adding a whole mess of new BESS. Earlier this month, Georgia Power Company submitted its 2023 Integrated Resource Plan Update (2023 IRP Update) to the Georgia Public Service Commission, which includes.

Georgia Power has identified sites for 500 MW of new Battery Energy Storage Systems (BESS) as part of its 2023 Integrated Resource Plan (IRP) update approved by the Georgia Public Service Commission (PSC). The planned installations aim to enhance energy supply stability and manage peak demand.

The projects, with a total capacity of 765MW, will be developed in Bibb, Lowndes, Floyd and Cherokee counties. The systems are sanctioned by the Georgia Public Service Commission through the Integrated Resource Plan.
