Georgia s electricity shift to energy storage

Overview

Georgia Power has broken ground on new battery energy storage systems (BESS) totaling 765MW across the state of Georgia, marking a major milestone in the utility's plans to meet rapidly growing electricity demand.

Georgia Power has broken ground on new battery energy storage systems (BESS) totaling 765MW across the state of Georgia, marking a major milestone in the utility's plans to meet rapidly growing electricity demand.

State resourcing plans are increasingly updating battery energy storage systems (BESS) plans, especially those tied to solar. From ESS News Resource Plan (IRP) with the first update since 2023 showing further acceleration in the utility's adoption of (BESS). Georgia serves as the eighth most.

Georgia Power's 2025 Integrated Resource Plan (IRP) has ignited a critical debate about the role of fossil fuels in a rapidly decarbonizing energy sector. While the utility positions its continued investment in natural gas and coal infrastructure as a pragmatic response to growing demand and grid.

Georgia Power has broken ground on new battery energy storage systems (BESS) totaling 765MW across the state of Georgia, marking a major milestone in the utility's plans to meet rapidly growing electricity demand. The construction, underway in Bibb, Lowndes, Floyd, and Cherokee counties, is part of.

ATLANTA, Sept. 23, 2025 /PRNewswire/ -- Georgia Power has announced the open comment period for its 2025 Request for Proposals (RFP) for Energy Storage System (ESS) resources. Approved by the Georgia Public Service Commission (PSC) as a part of the company's 2022 Integrated Resource Plan (IRP).
