Overview

Why is Ghana's energy sector in debt?

Ghana's energy sector has significant debt because of years of accumulated financial shortfalls from power pricing that does not recover full cost, although residential and business electricity consumers consider tariffs to be high.

How much energy is needed in Ghana?

Around \$70 billion of cumulative energy supply investment is needed in the STEPS, 60% of which is for upstream oil and gas. Investment ramps up by nearly 45% in the AC, with a strong emphasis on renewables and electricity networks. Thanks to notable efforts on electrification, the goal of full access is within grasp in Ghana.

Why is the energy sector a problem in Ghana?

Long delays in payments to power producers are a significant concern in the sector as the government pays for the subsidy from the national budget. Debt within the energy sector, coupled with the high cost of power in Ghana, creates a brake on Ghana's economic development.

What are the main sources of energy in Ghana?

Installed capacity is dominated by thermal (68%), followed by hydro (31%), and marginal renewables (0.82%)(Figure 1). Ghana's thermal dependency is due to high demand, unpredictable water levels in domestic dams, discovery of indigenous oil and gas, and the introduction of the West African Gas Pipeline.

How can Ghana improve energy security?

o Indigenous resources (hydropower, renewables, and natural gas) are the least-cost option over the entire planning period to improve energy security, and allow gradual grid integration of solar and wind. ● Renewable Energy. Ghana has a goal of 10% renewable generation by 2030.

Why should you invest in Ghana?

sa ion & Manufacturing %Nexus & Access 13%4. Investment prospectsGhana is a leading destination for renewable energy and green industry investments in West Africa,
