How long does it take for Swaziland s communications green base stations

Overview

Are green cellular base stations sustainable?

This study presents an overview of sustainable and green cellular base stations (BSs), which account for most of the energy consumed in cellular networks. We review the architecture of the BS and the power consumption model, and then summarize the trends in green cellular network research over the past decade.

What is a green base station?

This proliferation of BSs has resulted in consequential increase in energy consumption and Green House Gases (GHGs) emission. Several techniques have been deployed to reduce the energy consumption of the base station in what is called a green base station.

Can a green base station reduce energy consumption?

Several techniques have been deployed to reduce the energy consumption of the base station in what is called a green base station. This paper presents an insight into these approaches and highlights key challenges and potential research directions.

What should a base station do in a wireless communications network?

In a wireless communications network, the base station should maintain high-quality coverage. It should also have the potential for upgrade or evolution. As network traffic increases, power consumption increases proportionally to the number of base stations. However, reducing the number of base stations may degrade network quality.

When will mobile wireless networks be deployed?

mobile wireless networks are expected to be deployed by 2020 . Energy efficiency presents a key challenge for the previous generations . 3. Green Communication Research Trends in the Last Decade.

Can cellular BSS operators establish a green cellular network?

Case Studies for Enabling Green Cellular BSs operators establish a green cellular network. This section presents existing studies on cellular BSs and proposes directions for future research. 4.3.1. South Korea particularly its LTE cellular network, which offers data-oriented services. The LTE cellular network
