How many companies are involved in European energy storage projects

Overview

How many energy storage projects are there in Europe?

There are 147 energy storage projects under construction in Europe, with a total capacity of 14 GW, according to the European Energy Storage Inventory, launched by the European Commission. The European Energy Storage Inventory comprises operational, under construction, permitted, and announced energy storage projects across Europe.

What is the European energy storage inventory?

The European Energy Storage Inventory comprises operational, under construction, permitted, and announced energy storage projects across Europe. A real-time dashboard for energy storage also includes their locations and technologies – chemical storage, electrochemical storage, mechanical storage, and thermal storage.

Why is energy storage growing so fast in Europe?

The fleet of energy storage projects in Europe, including both pumped hydro and battery energy storage systems of all sizes, is expanding rapidly. This growth is set to continue at a strong pace through 2030, fueled by technological advancements, supportive policies, and other key factors.

Which energy storage technology is the most popular in Europe?

Pumped hydro is the most widely used technology for energy storage in Europe and worldwide, but batteries and hydrogen have come into the spotlight over the last decade as a recent trend in the energy storage market.

Will Europe continue to grow its energy storage fleet through 2030?

This growth is set to continue at a strong pace through 2030, fueled by technological advancements, supportive policies, and other key factors. Europe continues to grow its energy storage fleet at pace, advancing its transition to a more sustainable and resilient energy system.

Which countries have the most electrochemical storage installations in Europe?

Meanwhile, Germany and Italy remained the top markets for residential electrochemical storage deployment, despite a slowdown. Germany continued to lead Europe's residential storage sector, adding over 510,000 new installations in 2024, even after a 10% decline, the LCP Delta and EASE find.
