How many solar modules are exported from Zambia

Overview

How much solar power does Zambia have?

Zambia's installed solar capacity is 89 MW. Zambia has two utility scale solar power plants: French company, Neoen, and U.S. company, First Solar, own and operate the 47.5 MW Bangweulu Solar Power Station in Lusaka, of which the Zambian government holds a 20 percent stake through its Industrial Development Corporation (IDC).

How much electricity does Zambia produce?

Zambia has 2,800 MW of installed electricity generation capacity, of which 83 percent is from hydro, nine percent from coal, five percent from heavy fuel oil, and three percent from solar. The mining sector is the country's largest power consumer, using 51 percent of total generated electricity, followed by the domestic sector at 33 percent.

How does Zambia's Electricity Market work?

Zambia's electricity market is structured as a single-buyer market, with ZESCO acting as the sole off-taker and bulk retailer of electricity through the national grid.

What percentage of Zambians have access to the national power grid?

Only 43 percent of Zambians have access to the national power grid (67 percent of urban residents; and 14.5 percent of rural residents). ZESCO, a vertically integrated parastatal utility, operates government-owned power stations, and is responsible for maintaining and installing transmission lines and distribution networks.

What are the main hydroelectric power stations in Zambia?

Zambia's main hydroelectric power facilities are the Kariba North Bank Power Station (1,080 MW), Kafue Gorge Power Station (980MW), Kafue Gorge Lower Power Station (750 MW), Victoria Falls Power Station (108 MW), Lunsemfwa

Hydro Power Station (56 MW), and the Itezhi Tezhi Hydro Power Station (120 MW).

What is solar resource potential?

Solar resource potential has been divided into seven classes, each representing a range of annual PV output per unit of capacity (kWh/kWp/yr). The bar chart shows the proportion of a country's land area in each of these classes and the global distribution of land area across the classes.
